EXPERIENCE

Indeed, Austin, TX

Product Manager, January 2022 – Present

Research Engineer II, April 2021 – January 2022

Technical Business Analyst, April 2019 – April 2021

- Led multiple full product refreshes to convert manual sitemaps to automated processes. Conducted research and developed a roadmap that increased application paces from weekly/monthly to while converting to automated updates.
- Oversee a team of five engineers working on various projects and experiments
- Implementing growth experiments aimed at improving Indeed's SEO performance and increasing account creation.
- Conducting research, designed, and oversaw the implementation of various job search experiments that generated an average of 0.5-1.5% lift in account creations and 3-4% uplift in SEO-driven sessions per month.

The Golf Fellowship, Austin, TX

Austin Events Manager, January 2021 – Present

- Plan and execute weekly events and season-long competitions for 30-60 golfers in the Austin area, including scheduling, course and player communications, logistics, and on-site coordination.
- Develop and implement marketing initiatives and acquisition strategies to attract new members and increase participation rates.
- Manage all aspects of event organization, including budgeting, resource allocation, and vendor selection, to ensure smooth and successful events.
- Analyze participant feedback and event data to identify opportunities for improving member experience and engagement.

Bazaarvoice, Austin, TX

Software Engineer I, January 2017 – December 2018

Software Engineer II, December 2018 – March 2019

- Worked as part of the Conversations API team to develop and implement software solutions that enable retailers to gain insights into customer feedback and improve their products.
- Led a successful project to migrate clients from legacy API versions to modern API with minimal service disruption, improving efficiency and enhancing customer experience.
- Conducted regular analysis of customer feedback and usage metrics to identify areas for improvement and feature development.
- Managed Bazaarvoice's bi-annual hackathon events, fostering cross-functional collaboration among engineers and promoting innovation and experimentation with new technologies.
