Technology Towers Award**
2014 – 2016

EXTRACURRICULARS

**Georgia Institute
of Technology
College of Computing**
Incoming Student Mentor

Pi Kappa Alpha Fraternity
Member

Boy Scouts of America
Eagle Scout

EXPERIENCE

Indeed, Austin, TX
Product Developer, April 2021 – Present
Technical Business Analyst, April 2019 – Present

Working as part of the Job Search Growth team to plan, manage and engineer
software projects to improve the Indeed Job Search's SEO and better the
experience for Job Seekers worldwide.

Sitemap Automation
Automated the creation of sitemaps for use in indexing Indeed SERP's in
order to improve our result's performance across external search engines.
Automation of the process allowed us to update sitemaps on a weekly
basis as opposed to quarterly basis, reduced manual workload down from
a full day's work to less than an hour, and provided a 1.2% increase in
global traffic growth

SEO Experiments
Planned and developed a variety of experiments to test different
experiences for Job Seekers when interacting with Indeed Job Search.
Some experiments were simple implementations of direct ideas from the
SEO product organization, while others were developed as a response to
more open-ended questions posed by the organization.

Bazaarvoice, Austin, TX
Software Engineer I, January 2017 – December 2018
Software Engineer II, December 2018 – March 2019

Working as part of the Conversations API team developing software to better
help retailers understand what customers are saying about their products.

Conversations API
Leveraged newer ElasticSearch features to improve response times and
reduce number of database queries being made per API request.

Lead developer on project to migrate large scale clients from older API
versions onto newer stack to provide better service, and reduced server
costs, without service disruptions, or degradations in service.

Bazaarvoice Hackathons
Planned and directed Bazaarvoice's bi-annual hackathon events for
engineers to be able to work on side projects and experiments
with other Bazaarvoice technology.

VeriSolutions LLC, Atlanta, GA
Software Developer, January 2016 – December 2016

Lead developer for new customer facing portions of the VeriSolutions website.
Built and designed a variety of pages such as the blog, and employee pages,
and developed subscription service for users to follow the company's blog.
